

Using Compressed Cylinder Gases Safely (Non Oxy-Fuel)

This e-learning workshop is for individuals who use cylinder gases and equipment in a wide range of applications. Typically, this may be in a laboratory or research environment however, the training is designed to meet the needs of most cylinder gas users. The training contains information on:

- Oxidants and inert gases
- Fuel gases
- Gas cylinders and valves
- Using gas cylinders safely
- Gas regulators
- Safe handling of gas cylinders
- Safe storage of gas cylinders
- The correct set-up of a gas cylinder system

The training also contains an optional module on fixed gas supply piped systems and manifolds.

At the end of this online training workshop learners will be able to:

- Correctly identify gas cylinders
- Understand how cylinders operate
- Be aware of the hazards of asphyxia
- Recognise the hazards posed by oxygen enrichment
- Identify flammability hazards
- Select the correct gas control equipment
- Identify the key stages in using cylinders safely
- Recognise the hazards associated with handling cylinders
- Re-assess current storage facilities in line with safe working practices
- Become proactive in assessing risk when using gas cylinders
- Introduce safe working practices into their working environment

The fee for this workshop is £54.40 + vat per learner including online certification and comprehensive, readily accessible support documentation. We offer discounts for purchases of more than 10 training access codes, please contact us for further information.

You can purchase this e-learning workshop using a credit or debit card on our website. If you do not wish to purchase by card and instead wish to be invoiced, please contact us either by e-mail at admin@gassafetytraining.com or by phone during UK office hours on + 44 (0) 1270 758890.
